Research experience

Applied Research Summer Placement
UK Civil Service Jul 2018 – Sep 2018
An 11-week placement researching how machine learning and other data science techniques could be applied to aid my team with data annotation. Presented my work and an introduction to topological data analysis in a seminar for the data science community within the government department.

Applied Research Summer Placement
UK Civil Service Jul 2017 – Sep 2017
An 11-week placement researching the feasibility of using data science techniques to identify certain types of network devices based on limited information about their traffic. Presented my work at the kick-off meeting for an external workshop on analysing network traffic and as a seminar for the data science community in the government department.
